FIRE HYDRANT SYSTEMS

We provide a comprehensive range of fire hydrant system that are commissioned on a turnkeys basis. These are Fire Systems can easily detects fire in the initials stage and can be controlled automatically by dialing to the fire brigade authority. These projects are handle by our qualified team of personnel, who have vast experience in their respective field. Highly cost effective, our range of systems are known for their reliability and durable performance. Further, we also consider

the specific requirements of the clients while installing these systems.

FIRE SPRINKLER SYSTEMS

We offer an exquisite range of the sprinkler systems that are installed in various industries, hotels, hospitals and multiplexes to ensure safety measures. These fire sprinkler systems are purely maintained with the support of water supply that provide enough pressure and flow rate to a water distribution piping system, onto which fire sprinklers are connected. Our fire sprinkler systems are featured with superior quality standards and innovative design. Fully automatic, these fire sprinkler systems operate at a preset temperature, utilizing a fusible link, a portion of which melts, or a frangible glass bulb contain liquid which breaks, allowing the plug in the office to be pushed out by the water pressure in the fire sprinkler piping that results in water flow from the officer.

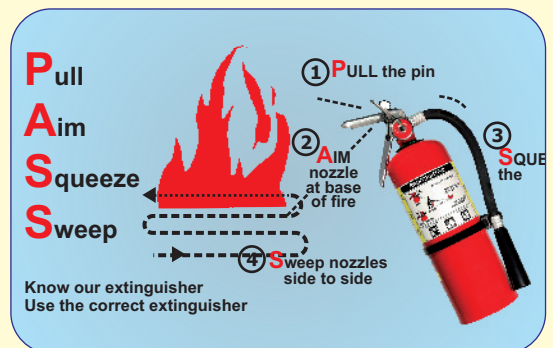

FIRE ALARM SYSTEMS

Catering to fire protection needs of teh clients, we offer services for the installation of fire alarm systems that are used for alarming people in case of fire. Designed in the most advanced ways, these are considered as the most reliable means of controlling fire. Fire alarm systems offered by us are in great demand by our customers due to their efficiency and response time. They are widely acknowledged for its design functioning. Further, we also provide customization facility as per the specifications of the clients.

PORTABLE FIRE EXTINGUISHERS SYSTEMS

Owing to our domain expertise, we offer our clients a wide range of portable fire extinguishers that find application in various commercial as well as residential areas. These portable fire extinguishers apply an extinguishing agent that will either cool burning fuel, displace or remove oxygen, or stop the chemical reaction so that fire cannot continue to burn. When the handle of an extinguisher is compressed, it open an inner canister of high pressure gas that forces the extinguishing agent from the main cylinder through a siphon tube and our the nozzle. Our range of fire extinguishers are eco-friendly, highly portable, low maintenance and robust in size and shape. Further, we also make sure these meet the requisite safely standards.
